Title and Content (default)

- Sleeping in his car was never the plan but sometimes things don't work out as **planned**. 한글 한글 This had been his life for the last three months and he was just beginning to get used to it. He didn't actually enjoy it, but he had accepted it and come to terms with it. Or at least he thought he had. All that changed when he put the key into the ignition, turned it and the engine didn't make a **sound**.
- 한글은 이렇게 보입니다. English랑 섞어 쓰기. 두꺼운 글씨체.

Hello $\int_0^x y \, dy$ ddd

- Queen $x^2 + y^2 = z^2$
- Hello World $\mathbf{A}^\top \mathbf{x} = \mathbf{0}$
- Good Morning $a \in \mathcal{A}, n \in \mathcal{N}, \mathbb{B}, \mathbb{E}$
- Good Night $\sum_{(i,j) \in \mathcal{A}} x_{ij} y_{ij} \leq 1$
- 안녕하세요 굵은 글씨 $\sum_{i=1}^n x_i = 1$
- Hello World

Bin Packing Problem

A binary integer program can be formulated as follows:

$$Z^* = \min_{\mathbf{z}} \sum_{k \in \mathcal{K}} z_k \quad (1)$$

$$\text{s.t. } \sum_{k \in \mathcal{K}} y_{ik} = 1 \quad \forall i \in \mathcal{I} \quad (\lambda_i) \quad (2)$$

$$\sum_{i \in \mathcal{I}} D_i y_{ik} \leq V z_k \quad \forall k \in \mathcal{K} \quad (3)$$

$$y_{ik} \in \{0, 1\} \quad \forall i \in \mathcal{I}, k \in \mathcal{K} \quad (4)$$

$$z_k \in \{0, 1\} \quad \forall k \in \mathcal{K} \quad (5)$$

where λ is a vector of Lagrangian multipliers for constraints (2). The binary variable y_{ik} is one if item i is packed in k and zero otherwise, and z_k is one if bin k is used.

Section Frame Title is Here. You can use this as a paper title and a very long title.

Theorems

Theorem (Necessary Condition)

Let $\lambda^* = \arg \max_{\lambda} g(\lambda)$ and $\mathbf{x}^*$ is the corresponding knapsack solution. We have

$$\sum_{i \in \mathcal{I}} \lambda_i^* x_i^* = 1. \quad (6)$$

This also implies $\lambda_i^* \in [0, 1]$ for all $i \in \mathcal{I}$.

This theorem is...
